

Submission by June 30th to rotary1910@rotary.at

RC Banja Luka Project name: **Installation of the first AED in RS**

Short description of the project's success / sustainability: *(separate supplement possible)*

Automatic external defibrillator (AED) is a device that can save the life of a person who has life-threatening arrhythmia. The device is used by laypersons in public places such as airports, train stations, parks (e.g. Disneyland Park), big shopping malls or hotels. In Republika Srpska there was no AEDs installed.

Prof. Aleksandar Lazarevic, a cardiologist and an honorable member, have trained all the members of the club on how to use AED.

Rotary's roll: *(involvement, visibility, PR ...)*

Our club did the whole project, and our plate is positioned with AED on the place which is most frequent place in this unique Cultural centre. Most of nationwide written media made report of this noble actions of our Club.
